Login Help

If you are having trouble logging in to your SchoolDude account, first make sure you are on the correct website.

**Note: If your organization is using SSO (single sign on) for user authentication, your login experience may be different. If you are having difficulty logging in using SSO or you are unsure whether your organization utilizes SSO for their Dude Solutions products, please contact your technology help desk for assistance.*

- Go to login.schooldude.com. **Note: We have found that [bookmarks](#) occasionally generate an error when using them to access the login page. If you are accessing the login page through a saved bookmark, please click on the link provided above or type login.schooldude.com into your web browser.*
 - If you are trying to submit a request, you may be on the wrong login page. Please look at our [MySchoolBuilding login help](#).
- On this page, ensure that you enter a **Login Name**, **Password**, and select the correct product in the **Product** drop-down menu. You will not be able to log in without selecting a product in the **Product** drop-down menu.
 - If needed, click on the eye icon () to view the text you have entered in the Password field.
 - If your Login Name or Password is automatically filled in on this page, please delete the text in the fields and retype your login information.
